

SPACE AND PERSPECTIVE: CHOICE OF MEDIA

GOAL: students will learn the basics of **perspective**, and understand **foreground, middle ground, and background**. students will then take their own photograph of a subject of their choice. their photo should be from an interesting **vantage point** and show space. students will complete their work in the **media** of choice: graphite, tempera, color pencil.

process steps:

- understand perspective, foreground, middle ground, background, and vantage point.
- take a picture of a subject of your choice. however, your photo should be from an interesting perspective and show space.
- decide what media you will use to complete this project: graphite, tempera, color pencil
- lightly draw the composition.
- use value and contrast to complete your project.
