

HOW TO DRAW YOUR CAN

the right way

choose a crushed can

write your name and period # on the back.

make a grid on your paper

measure 2 times to make a straight line: horizontally and vertically. Then, connect corner to corner for a diagonal

sketch an outline of the general shape of the can

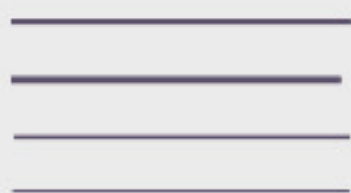

erase your grid lines

look closely and draw all the details that you see: creases, lettering, rim of the can, etc.

begin **shading** using at least 7 values of gray

tonal gradation make sure your values transition seamlessly from one value to the next

focus on the metallic **texture** and emphasize the highlights and shadows.

Check over your work for any last changes and **turn in your work.**
